TRUTHFULNESS SCALE PARAGRAPHS

SEX ITEM TRUTHFULNESS SCALE

SCALE SCORE: 79 This juvenile's Sex Item Truthfulness Scale score is in the Problem Risk (70 to 89th percentile) range. Problem risk scorers attempt to minimize their sex-related problems and concerns. Truth-corrected scale scores are accurate, but interpret them cautiously. This juvenile is defensive and uses denial excessively. Considerable insight can be gained by comparing this Sex Item Truthfulness Scale score to this juvenile's Test İtem Truthfulness Scale score.

TEST I TEM TRUTHFULNESS SCALE

SCALE SCORE: 69 This juvenile's Test Item Truthfulness Scale score is in the Medium Risk (40th to 69th percentile) range. This juvenile tends to be guarded and elusive regarding self disclosure. Nevertheless, answers to non-sex-related items on the Sexual Adjustment Inventory(SAI) are accurate. Non-sex-related scales include: Test Item Truthfulness Scale, Alcohol Scale, Drugs Scale, Impulsiveness Scale, Violence Scale, Antisocial Scale and the Distress Scale.

The Sex-Item Truthfulness Scale measures client truthfulness while the offender answers sex-related questions. The Sex-Item Profile follows.

MEASURES/SCALES	%ile	SEX ITEM SCALES SEX ITEM SCALE PROFILE			
SEXUAL ADJUSTMENT	74	- LOW RISK - MEDI UM - PROBLEM- MAX-			
CHILD MOLEST	4				
SEXUAL ASSAULT	86				
EXHIBITIONISM	49	- -			

----- INCEST CLASSIFICATION: did not admit to any incest items -----

A REMINDER: Elevated (70th percentile and higher) scale scores are indicative of problematic behavior. As scale scores increase the client's problematic behaviors become more problematic and severe.

SEX SCALE PARAGRAPHS

SEXUAL ADJUSTMENT SCALE

This juvenile's Sexual Adjustment Scale score is in the Problem (70 to 89th percentile) range. Sexual Adjustment problems and concerns are present. Admission items include: # 14, 205. Sex adjustment problems and concerns interact with other elevated (70th percentile and higher) sex-item scale scores. This individual manifests sexual adjustment concerns. Individual (or group) outpatient sex adjustment counseling may be warranted.

CHILD MOLEST SCALE

This youth's Child Molest Scale score is in the Low Risk (zero to 39th percentile) range. Low Risk scorer's are not pedophiles or child molesters. Yet the following caveat applies: "Always verify juvenile truthfulness on sex-related scales with the SAI Sex Item Truthfulness Scale score." Low Risk scorers on the Child Molest Scale do not present as child molesters. The least restrictive disposition consistent with public safety appears warranted.

SEXUAL ASSAULT SCALE

This juvenile's Sexual Assault (Rape) Scale score is in the Problem (70 to 89th percentile) range. Problem risk scorers have a higher than average probability of committing rape. Admission items Recommendation: review the include: # 74, 188, 201. youth's court records, treatment history, prior evaluations and any other elevated SAI scale scores. Recommendation: outpatient (individual or group) counseling or psychotherapy might be considered.

EXHI BI TI ONI SM SCALE

This youth's Exhibitionism Scale score is in the Medium Risk (40 to Purposeful or intentional exposure of ones 69th percentile) range. sexual organs (genitals) to unsuspecting persons is very unlikely. People with this disorder are usually not physically dangerous. Exhibitionist's motivation is often the desire to surprise or shock the It should be emphasized that this individual is not observer. an

VIOLENCE SCALE

SCALE SCORE: 30 This juvenile's Violence Scale score is in the low Risk (zero to 39th percentile) range. Low risk scorers are usually nonviolent. However. some violence may be situation specific. Violence, as defined herein refers to physical force used to injure, damage or destory. Thi s violence definition is more generic or inclusive than the focused violence inherent in sexual assault (rape), but there may be considerable overlay.

ANTI SOCI AL SCALE

This youth's Antisocial Scale score is in the Problem (70 to 89th percentile) range. Antisocial thinking, attitudes and behavior are Admission items include: # 186, 221. evi dent. Recommendations: individual or group counseling (e.g., cognitive-behavioral therapy) could be helpful. This problematic scale score did not occur by chance. Antisocial attitudes and thinking are present and should be resolved before the become serious and established. This is a "problematic" Antisocial scale score.

DI STRESS SCALE

This juvenile's Distress Scale score is in the Problem (70 to 89th percentile) range. This juvenile is experiencing distress. Admission items include: # 68, 125, 229. Suic probl emati c Sui ci dal thi nki ng (#175 or 219) was not admitted. Treatment (counseling) intensity should match the severity of distress intensity. Individual or group outpatient counseling might be considered. This juvenile is troubled and concerned. Recommendation: stress management counseling. Thi s score did not occur by chance.

I MPULSI VENESS SCALE

vouth's Impulsiveness Scale score is in the Problem (70 to 89th Thi s percentile) range. Regarding sexual impulsivity disorders, paraphiliarelated disorders have been reported as comorbid with mood and sub-stance abuse disorders. This youth manifests problematic impulsiven-Recommendation: outpatient group counseling should be helpful. ess. Other elevated SAI scales could provide insight regarding "impulsive focus" and exacerbating factors. This juvenile manifests problematic

SCALE SCORE: 80

impulsiveness.

ALCOHOL SCALE This juvenile's Alcohol Scale score is in the Medium Risk (40 to 69th percentile) range. Some indicators of alcohol use are present. But an established pattern of alcohol abuse is not evident. Drinking is not a problem at this time. That said, drinking may interact with other substances (other drugs) in unusual ways. Carefully review the Drugs Scale score as drugs could exacerbate the effects of alcohol use.

DRUGS SCALE SCALE SCORE: 61 This youth's Drugs Scale score is in the Medium Risk (40 to 69th percentile) range. Some drug involvement is indicated, but an established pattern of drug abuse is not evident at this time. Thi s client states (item #224) that he is not a recovering substance abuser. With regard to drugs, the least restrictive disposition consistent with public safety is recommended. Intervention and/or treatment intensity should always match drug problem severity. Attendance at Narcotics Anonymous or Cocaine Anonymous meetings might be considered.
